

CallPort - Small Site Solution

8el CallPort

A hosted, fully managed VoIP solution

8el's hosted, fully managed VoIP service. Providing an efficient and cost effective alternative to an IP PBX.

CallPort – small site solution

8el's hosted, fully managed VoIP service. Providing an efficient and cost effective alternative to a traditional telephony solution, and a robust, reliable alternative to other Centrex solutions

CallPort – small site solution, is a fully managed, cloud based VoIP telephony solution for small and start up businesses; replacing the need for a traditional LAN based IP PBX or analogue phone.

CallPort incorporates all of the functionality and feature benefits you would expect from a “business grade” telephone system, enabling true worker mobility, unified communications and secure, reliable access to your company's resources and information, wherever and whenever you need it.

Suitable for:

- ✓ Small businesses of 12 employees or less
- ✓ Scalable solution to grow with your business
- ✓ Businesses looking for a fully managed, user friendly telephony solution

Benefits:

- ✓ Cost effective solution for hosted IP telephony
- ✓ Streamlined installation using shared technology at 8el core
- ✓ Plug and play technology – no technical expertise required
- ✓ Simple and quick process from order to use
- ✓ Feature rich
- ✓ Private connectivity to ensure call quality

How does it work?

The hosted, fully managed alternative to a LAN based IP PBX

Rather than requiring multiple ISDN or analogue lines, CallPort for small businesses simply needs an 8el private ADSL connection from your office back into the 8el core network. IP Phones talk to the centralised gateway inside 8el's core over the private ADSL ensuring a reliable connection for your calls out to the PSTN over alternative solutions utilising the public Internet. As part of the solution 8el will supply and manage the ADSL connection as well as all moves adds and changes throughout the term of the contract allowing you to focus on your core business activity.

To compliment the solution secure Internet Access can also be provided. The 8el ADSL connection will route VoIP and ISP traffic between your office and the 8el Core. With this solution you can be safe in the knowledge that the quality of your VoIP traffic will not be affected when sharing the line with Internet traffic.
